

Cabrini. For your total neurosurgical care.

As one of Victoria's largest private providers, Cabrini is a leader in comprehensive neurosurgical and neurological care. At Cabrini, we offer rapid diagnosis, surgery and ongoing treatment/management of conditions – with outpatient visits and specialised rehabilitation programs to assist people with neurological conditions and movement disorders.

Neurosurgery

Choosing Cabrini for your neurosurgical care means having your choice of experienced specialist, rapid access to surgical and diagnostic services and reduced waiting times for surgery.

At Cabrini, our neurosurgeons use a range of advanced treatments including minimally invasive surgery, cranial neuro and neurovascular surgery and deep brain stimulation. The expert clinical care provided by our doctors is enhanced by the use of state-of-the-art neurosurgical operating technology.

Who are Cabrini's neurosurgeons?

Cabrini has a team of experienced neurosurgeons who can offer rapid diagnosis and treatment. All surgeons have international fellowship qualifications and work cohesively on complex cases, striving to achieve the best possible outcomes for their patients:
