

# Worried about your condition?

At Cabrini, your care and safety is our priority. We understand that you know 'what's normal' for you better than anyone else.

We want you to tell us if you have any concerns about your condition.

The **CALL AND RESPOND EARLY** patient safety program encourages patients, families and carers to be involved in the care we offer:

**1**

Talk to your nurse, doctor or midwife about your concern(s).

**2**

If you are still concerned, speak to the nurse or midwife in charge.

**3**

If you are not satisfied, call the Hospital Coordinator on **ext 1770** (phone 9508 1770 if calling from outside the hospital).

**1770**
