

Flowchart: Completing a Resuscitation Plan

Check for existing Advance Care Directive, MTDM or other relevant documents Consider whether patient meets criteria for resuscitation planning

Healthcare team decide which treatments should be offered to patient in the event they deteriorate

Futile treatments should not be offered; rationale for withholding such treatments should be explained to the patient/MTDM

Medical Officer to discuss with patient/MTDM the treatments available in the event of deterioration

Discuss risks, benefits and alternatives to allow patient/MTDM to make an informed decision about whether they want/do not want available treatments

Medical Officer to document treatment option A, B or C on MR 004

Medical Officer to document discussion on page 2 of MR 004

Medical Officer to notify patient's nurse and any other involved Medical Officers

File MR 004 in patient's medical history behind green divider
